

# Let's Talk Safety

## #1 Safety 365: Stand up for safety

Standing up for safety means always having the courage and conviction to do the right, safe thing.

### Think about it

- When we stand up for safety, we live our Values and contribute to achieving our desired culture of purpose-led, high-performing teams taking safe and responsible actions together to achieve extraordinary outcomes.
- We won't always feel confident to learn, share and challenge in the best possible way. What matters is that we don't let it hold us back.
- If you're feeling unsure, let your colleagues know you're standing up for safety and that's why you're taking action.

### Talk about it

- What needs to happen for you to always feel safe to question instructions or decisions that could compromise your safety? Think about what you can do personally and what you might need from others.

### Act on it

- Take pride in following our processes and procedures because we know they define the safest way to work.
- Look for ways to continually improve.
- Hold yourself and your teammates to account.
- Do whatever it takes to keep each other safe. Because nothing is more important than our safety.
- When we hear a colleague say they're standing up for safety, let's all be open and supportive, so together we all stay safe.
